PROJECT EXPERIENCE (SUMMARY)

FINANCE

INTRODUCTION OF TABLEAU

Introduction of Tableau to an international Pharmaceutical corporation as the global Self-Service BI reporting platform. The project included the planning and installation of a Tableau Server platform as well as the onboarding of users. Furthermore, the initiative included as well the design and implementation of several dashboards for the Finance team.

EXECUTIVE DASHBOARD FOR C-LEVEL

Project for the company's internal Finance Team. Design and Implementation of a Finance Dashboard which helped C-Level to track and monitor targets vs. actuals. During the project the requirements have been defined during discussions with the Finance team as well as with the management team. During the project the data source was moved from SAP BW to SAP HANA.

IT

TABLEAU SERVER USAGE REPORT

Design and implementation of a Tableau Dashboard which helped the global IT to monitor the usage of Tableau Server in order to prevent unnecessary down times and problems. The data source was based on the Tableau Server Repository PostgreSQL database

DATA SOURCE MONITORING

Development and creation of IT dashboards to track performance, issues, processing times as well as SLA checks and other data governance topics.

PERFORMANCE OPTIMIZATION

As part of an IT initiative we analyzed several Tableau Workbooks and optimized the loading performance of these workbooks by up to 80%. The project included. the analysis and re-work of the workbooks.

PROJECT EXPERIENCE

FACILITY MANAGEMENT

ASSET PERFORMANCE COCKPIT

Design and Implementation of a dashboard for the site service team based on live SAP HANA connection. The

LOGISTIC

SUPPLY CHAIN COCKPIT

Design and implementation of a Tableau Dashboard to track several Logistics related dashboards based on SQL Server and SAP HANA. The challenge was to combine data from two sources.
